

**KÄRCHER****Filter mat 3-layer for BIO parts cleaner, Type: BIO****Order data**

Order number	082948 BIO
GTIN	4039784241985
Item class	07C

**Description****Version:**

The purpose of the filter mat is to filter out dirt particles down to 50 µm size. There are microbes within the filter mat. When the device is first filled these microbes are washed out in to the tank of the device and are activated. The multi-layer filter mat contains three layers of fleece. This means that after 1-2 weeks the topmost dirty layer can be removed, exposing a fresh clean layer.
