

**RackGuard™ racking leg protector narrow, Type: LL****Order data**

Order number	994419 LL
GTIN	5056114580780
Item class	99T

Description**Version:**

The RackGuard™ racking leg protector protects the exposed racking legs from lateral and frontal impacts by industrial trucks, causing scratches and damage. The impact energy is directed around the foot instead of through it, thereby reducing damage and protecting the stability of the racking system. Rubber inlays ensure safe retention on commonly-used racking legs. Honeycomb structure for attenuation of impacts. Maximum impact energy at 90°: 1000 Joules. Impact zone 0 – 600 mm. Deformation at maximum energy: 20 mm. Very good resistance to weather, very good colour fastness.

Standard:

EN 15 512, FEM 10.2.02, AS 4084

Suitable for:

Schulte pallet racking for the frame profile S635-B20. Pallet racking from SSI Schäfer with stand profile P100.

Note:

Racking leg protector for other racks can be offered on request.

The racking leg protector must only be attached to the intermediate post. It is not permitted to be used as a corner crash barrier. Corner crash barrier and racking leg protector for other racks can be offered on request.

Technical description

Height	400 mm
Depth B max.	80 mm
Weight	1.9 kg
Width A max.	102 mm
Type of product	Crash barrier
