

**Sheet metal centre drill Power Charge Plus, Tool material: HSS-CO****Order data**

Order number	589805 HSS-CO
GTIN	4059952536491
Item class	54B

Description**Version:**

Quick Change system for greater efficiency – attaching the centre drill to the adapter has always been difficult. This costs professionals time and money. With the EXPERT Power Change Plus, you can change the hole saws in seconds thanks to the clever one-click adapter from Bosch. This keyless system does not need to be secured with screws or bolts. One hole saw is simply pushed out and another is pushed in. Despite the clear simplicity of this design, the EXPERT Power Change Plus still provides a secure connection: Thanks to a reinforced shank and a tight-fitting pilot drill, it actually has less clearance than conventional systems. The Bosch EXPERT Power Change Plus hole saw system is designed to provide users of hole saws with the best connection and maximum efficiency. This saves time and handles the most difficult tasks at a high level. For use with the Power Change Plus quick-release adapter from Bosch: for accuracy and robustness.

Suitable for:

PC Plus holder for use with EXPERT Sheet Metal PC Plus hole saws with a cutting depth of 5 mm.
