

USB hand-held microscope, Manufacturer's designation: AF3113T

Order data

Order number	492032 AF3113T
GTIN	4712805479474
Item class	49K

Description

Version:

Easy-to-use portable digital microscope for professional use in various disciplines. Thanks to the CMOS chip / USB 2.0 connectivity, it can be easily connected to any device and offers outstanding image quality and up to 220x magnification. Polarisers reduce reflections on shiny objects and improve contrast. The magnification depends on the desired field of view. The smaller the field of view, the higher the potential magnification. Models with a long working distance can be used if you need a greater distance to the object. Includes intuitive measurement software for Windows and macOS. Has measurement functions as well as microtouch button for recording images directly.

Supplied with:

Measurement software DinoCapture 2.0 (Windows) and DinoXcope (macOS).

Optional extras:

Pillar stand No. 492035

Note:

Other versions (e.g. with coaxial incident light, ESD protection, etc.) and system calibration service available on request.

Technical description

Data sheet

Camera	VGA (640x480) CMOS colour camera
Manufacturer's designation	AF3113T
Interface	USB interface
Magnification (x-times)	20 – 55; 220
Type of product	Video hand-held microscope
