

Length setting gauge

Order data

Order number	358400
GTIN	4045197554369
Item class	32Z

Description

Version:

Tools are set to length from 20 - 125 mm and are held in the jaws by a clamping spring - no force needs to be applied.

Advantage:

Pre-setting of tool free lengths up to 125 mm, saves time due to ease of operation, tools do not "drop through" e.g. for shrink-fit arbors, high stability, high degree of safety.

Application:

Tools can be pre-set to 0.5 mm accuracy, suitable for all tool arbors (such as shrink-fit arbors, ER collets, Weldon arbors etc.).

Suitable for :

All popular parallel tools from \varnothing 3 - 20 mm.
