## **Description**

#### **Version:**

**The patented sickle-shaped strip-form** and configuration permit a high coating density for an exceptional metal removal rate and a long tool life. High-quality mounting on a steel or glass fibre pad for low-vibration working at reduced noise levels.

**ZA:** Pure **Zirconium Aluminium Oxide** on a polyester-cotton mixed fabric. Very aggressive due to the open grit distribution.

**ZA-Power:** Special **Zirconium Aluminium Oxide mixture** with active coating. Cool cut, with no glazing or clogging.

**CER:** Very high abrasion performance, **ceramic grit** with self-sharpening effect. No glazing or overheating. Highly suitable even for edge grinding.

**SiC:** Particularly coarse **Silicon Carbide grit**, does not clog. Highly suitable for aluminium and fibre-reinforced composite materials.

**CER:** Very high abrasion performance, **ceramic grit** with self-sharpening effect. No glazing or overheating. Highly suitable even for edge grinding.

#### **Application:**

For very high material removal rates and long working life.
