# Garant

## Fixed solid carbide lathe centre 60°, very large Ø / Morse taper: 60/4

# Order data

Order number	323200 60/4
GTIN	4045197882486
Item class	31Z

### Description

### Version:

- High-precision solid carbide tip. Close-fitting carbide design for optimum stability and freedom from breakage, no additional safety equipment required.
- Tip angle 60°.
- High surface quality on the shank for optimum fit.
- · Complete tool hardened and ground.
- With carbide tips for applications with high wear.

### **Description:**

Lathe centres are mainly used on lathes to support long and slim workpieces, since with these workpieces there would otherwise be a risk of the workpiece bending or moving around as a result of the forces generated.

The lathe centre is secured with a Morse taper. The workpiece is clamped in the chuck and a counterbore is added using a centre drill. After re-clamping, the lathe centre is then inserted.

#### **Application:**

For grinding high-precision components.

### **Optional extras:**

Draw-off nut No. 323230.

### Note:

Order the draw-off nut separately. Geometric dimensions to DIN 806 E. Head length L: 57.5 mm External Ø D: 60 mm

Ø d: 45 mm

maximum radial run-out: 0.001 mm

# **Technical description**

External Ø D	60 mm
Morse taper	4
Ød	45 mm
maximum radial run-out	0.001 mm
Head length L	57.5 mm
Type of product	Centring drill
