

**Dräger****Half-face mask X-plore® 4740, Size: ML****Order data**

Order number	097241 ML
GTIN	4026056002726
Item class	09I

**Description****Version:**

The special feature of the X-plore® 4740 half-face mask body is its toughness. The ergonomic sealing lip of silicone is also suitable for sensitive skin and ensures very high wearing comfort due to exact accuracy of fit, comfortable and tight seating virtually pressure-free. The **single-filter half-face mask** with standard round thread connection RD40 to EN 148-1 has an all-round plastic body, which gives the resistant mask body its **robustness and long life**. The Dräger **“Flexi-Fit head mounting”** makes the mask easy to pull on and off, as well as providing an excellent seat and retention without catching on the hair. The **“Drop-Down banding system”** with neck locking allows easy removal of the mask during breaks in work, without requiring removal of the safety helmet. Suitable for medium to large faces.

**Standard:**

EN 140

Colour code for suitable accessories: RD40
