

Dräger**Half-face mask X-plore® 3500, Size: L****Order data**

Order number	097244 L
GTIN	4026056001088
Item class	09I

Description**Version:****Convenient two-filter half-face mask for long-lasting use under demanding conditions.**

The flat design and the lateral attachment of the filter ensure an extremely flat mask profile. This makes the half-face mask ideal for fitting with other personal protective equipment (for instance under a protective visor or with safety glasses) and offers the wearer a good field of view. The lightweight adjustable retainer straps are arranged in an innovative X-pattern (diagonal) and ensure uniform, pleasant distribution of the tensile forces, with optimum leak-tightness. The lateral bayonet connections are suitable for the use of the Dräger X-plore® bayonet filter series. The „**Drop-Down banding system**” with neck locking allows easy removal of the screen during breaks in work, without requiring removal of the safety helmet. Available in the sizes M and L. The mask is silicone-free.

Application:

Metal and automobile industry, chemical industry, shipbuilding, maintenance, supply and disposal.

Standard:

EN 140

Supplied with:

Carrying bag

Colour code for suitable accessories: Bayonet

Product features: Silicone-free

Filter connection: X-plore® bayonet

Weight: 95 g

Manufacturer's designation: R 55 352
