### **Order data**

Order number	575018 80
GTIN	4045197892690
Item class	51P

# **Description**

#### **Version:**

With longitudinal groove for clamping on face mill arbors (DIN 6357) and combination face mill adapters (DIN 6358).

Disc brushes with **extremely tightly packed abrasive bristles (right to the edge of the brush)** embedded in the plastic pad. The bristles support each other, giving a **highly stable shape**. Very long working life.

Nylon bristles with very high **silicon carbide grit content** for general-purpose use.

#### **Advantage:**

- · Workpiece rework directly after the machining process.
- · Reproducible results due to constantly exposed grinding grit.
- · Good process reliability thanks to high shape stability and shape accuracy.
- · Quick and secure installation without further accessories.
- · Very low radial run-out.

## **Application:**

On **CNC** machining centres and when used by **robots**, preferably **wet** grinding with cooling lubricant. Machining of flat components: precise **deburring**, **edge** rounding, **finish** machining after milling, **surface finishing** e.g. of sealing and mating faces.

#### Note:

Special versions available on request.
