

# Fixed solid carbide lathe centre 60°, very large Ø / Morse taper: 70/3

## **Order data**

| Order number | 323200 70/3   |
|--------------|---------------|
| GTIN         | 4045197947819 |
| Item class   | 31Z           |

# Description

#### **Version:**

- · High-precision solid carbide tip. Close-fitting carbide design for optimum stability and freedom from breakage, no additional safety equipment required.
- · Tip angle 60°.
- · High surface quality on the shank for optimum fit.
- · Complete tool hardened and ground.
- · With carbide tips for applications with high wear.

### **Description:**

Lathe centres are mainly used on lathes to support long and slim workpieces, since with these workpieces there would otherwise be a risk of the workpiece bending or moving around as a result of the forces generated.

The lathe centre is secured with a Morse taper. The workpiece is clamped in the chuck and a counterbore is added using a centre drill. After re-clamping, the lathe centre is then inserted.

## **Application:**

For grinding high-precision components.

### **Optional extras:**

Draw-off nut No. 323230.

#### Note:

Order the draw-off nut separately. Geometric dimensions to DIN 806 E.

Head length L: 44 mm External Ø D: 70 mm

Ø d: 55 mm

maximum radial run-out: 0.001 mm

# **Technical description**

| External Ø D           | 70 mm          |
|------------------------|----------------|
| Morse taper            | 3              |
| maximum radial run-out | 0.001 mm       |
| Head length L          | 44 mm          |
| Ød                     | 55 mm          |
| Type of product        | Centring drill |
