Order data

Order number	122725 7/16
GTIN	4045197957191
Item class	11E

Description

Version:

3-flute drill, specially developed for use at **very high feed rates**. Outstandingly suitable for **machines with high installed power** and stable operating conditions.

- Special cutter geometry with stable cutting edges and large clearance at the centre enables very high feed rates.
- The patented tip is optimised for chip flow and generates low cutting pressure with good chip breakage.
- With 145° tip angle for low burr formation when drilling through holes.

The sector-leading technology of the chisel edge guarantees optimum self-centring behaviour and permits spot drilling on irregular surfaces. 3 guide chamfers guarantee a stable

exit from the hole and an exact roundness of the hole.

Note:

Flute length $L_c = L_2 + 1.5 \times D_c$. Form HB and HE supplied at the same price as HA. Form **HB**: order with **No. 122726**. Form **HE**: order with **No. 122725 + 129100HE**. Standard: DIN 6537 Tolerance nominal Ø: h7 Number of cutting edges Z: 3 Tolerance nominal Ø: h7 recommended maximum drilling depth L_2 : 54.4 mm Overall length L: 118 mm Shank Ø D_s: 12 mm Feed f in steel < 1100 N/mm²: 0.5 mm/rev.
