| GTIN | 4021176030383 |
| Item class | 83U |

Description

Version:

One side with separation claws for loosening flush fitted parts, the other side with normal extractor jaws. To free the bearing the separation claws are pressed between bearing and bearing seat by closing the clamp. The bearing is then fully removed by use of the spindle.

Application:

For extracting ball races, pinions and so on, where access is difficult. For many jobs where normal extractors cannot be used due to lack of space.
