

Pin extractor set

Order data

Order number	882000
GTIN	4021176924569
Item class	83U

Description

Version:

Sturdy extractor (galvanised) with ergonomically shaped sliding hammer.

Application:

For extracting and pulling off parts with internal threads (taper pins or dowel pins) and ball bearings. The appropriate adapter or internal extractor is attached to the part to be extracted, which is then pulled off by firm strikes with the sliding hammer.

Supplied with:

Pin extractor in a plastic case (275×230×80 mm) with 6 threaded inserts (M3 – M10), 3 adapters for internal extractors No. 882600. For M12 the slide bar is used without a threaded insert. Accepts threaded inserts to DIN 913.

Technical description

Hammer mass	0.9 kg
Adapter for internal extractor	M7×M12, M10×M12, 15-16G×M12
