

RENISHAW**Module holder, Type: TP200****Order data**

Order number	494205 TP200
GTIN	2050001957153
Item class	49F

Description**Version:**

The modular design of probe holder and removable probe modules allows the facility of exchanging manual and automatic probe modules without laborious recalibration. For probes with RENISHAW automatic holder (autojoint), a PAA adapter has to be used.

The TP200 measurement probe uses a sensor based on strain gauge technology, which ensures excellent reproducibility and highly accurate 3D free-form measurements, even when using long probe inserts. The TP200 can be used with all probes which have an M8 connection thread.
