

Bearing separator individual, Type: 1

Order data

Order number	884600 1
GTIN	4021176008283
Item class	83U

Description

Version:

Bearing separator of high-quality tool steel.

Separator: The quick-release semicircular jaws are symmetrically tensioned by a screw. This causes the wedge-shaped jaws to insert themselves between bearings and shaft.

Extractor: Used in conjunction with the separator to extract bearings from their seating (for this the draw bolts are screwed into the threaded holes in the separation jaws). The semicircular separation jaws are symmetrically tensioned by a quick-release pressure spindle.

Application:

For the separation of tightly wedged ball bearings, gears, etc., if the gap is too small for normal extraction arms.

Technical description

Connection thread for bearing extractor	M10
Clamping range dimension A	12 - 75 mm
Spacing of side pins dimension B	75 mm
Type of product	Separator

Accessories

Bearing extractor individual Type 1	884700 1
