

Bearing separator individual, Type: 5

Order data

Order number	884600 5
GTIN	4021176007453
Item class	83U

Description

Version:

Bearing separator of high-quality tool steel.

Separator: The quick-release semicircular jaws are symmetrically tensioned by a screw. This causes the wedge-shaped jaws to insert themselves between bearings and shaft.

Extractor: Used in conjunction with the separator to extract bearings from their seating (for this the draw bolts are screwed into the threaded holes in the separation jaws). The separation jaws are tensioned by tightening the nuts on the side spindles.

Application:

For the separation of tightly wedged ball bearings, gears, etc., if the gap is too small for normal extraction arms.

Technical description

Clamping range dimension A	30 - 250 mm
Connection thread for bearing extractor	G3/4
Spacing of side pins dimension B	250 mm
Type of product	Separator

Accessories

Bearing extractor individual Type 5	884700 5
