Order data

Order number	117020 M10
GTIN	4045197035684
Item class	11C

Description

Version:

Very sturdy. Tight concentricity tolerances between drill \varnothing and counterbore \varnothing guarantee exact alignment.

Special surface treatment, resulting in reduced tendency to edge build-up and improved chip evacuation.

Advantage:

Hole and countersink are produced in one operation and precisely aligned.

Application:

Particularly suitable for NC machines due to high positional accuracy, excellent centring properties and great sturdiness. The preceding centring operation can thus often be omitted. For thread tapping drill holes to DIN 336 sheet 1 with 90° countersink. In the following operation, the tap therefore does not have to cut into the sharp edge of the hole.

Countersink angle: 90°

No. of teeth Z: 2 Through-coolant: no

 \varnothing D₁ 1st step with chamfer h8: 8.5 mm \varnothing D₂ 2nd step with chamfer h8: 11 mm

Step height L₁ 1st step: 25.5 mm

Flute length L: 47 mm Overall length L: 95 mm Shank Ø D: 11 mm
