| GTIN | 7312550118955 |
| Item class | 09A |

Description

Version:

Titanium sloping roof set – for working on sloping roofs consisting of:

- 1x titanium 2-point safety harness with rear and front attachment eye.
- 1x automatic following attachment device 10 m (No. 098140).

Application:

For maintenance work and for working on sloping roofs as well as for security on ladders.

Standard:

EN 363

Note:

Products predominantly of chemical fibres have a working life of max. 10 years from the date of manufacture. The precondition for this is that an annual test is performed by a specialist (visual inspection). This means all belts, connecting straps, fastening loops that consist predominantly of textiles (chemical fibres)

Weight: 269 kg
